**Re: Response of Avery International Corporation, on behalf of its Divisions Thermark and Soabar Coatings, to U.S. EPA's First and Second Requests for Information Pursuant to Section 104 of CERCLA, 42 U.S.C. § 9604, Regarding the Lake Calumet Cluster Site in Chicago, Illinois**

Dear Ms. Ortiz:

Thermark and Soabar Coatings separately received U.S. EPA's First Requests for Information ("Information Requests") pursuant to Section 104 of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") relative to the Lake Calumet Cluster Site ("the Site") located in Chicago, Illinois on December 17, 2004. Thermark and Soabar Coatings also separately received a second set of Information Requests relative to the Site on January 18, 2005. Since Thermark and Soabar Coatings are divisions of the same entity, Avery International Corporation ("Avery"), Avery is submitting this response to the above Information Requests on their behalf. Unless otherwise specified, all responses are applicable to both Thermark and Soabar facilities. Avery would like to thank U.S. EPA for granting an extension until February 17, 2005 (the deadline for responding to the Second Set of Information Requests) in which to submit this combined response to both Information Requests.

#### **INTRODUCTORY STATEMENT**

In preparation for this response, Avery has undertaken a reasonable investigation, search, and review of its files expected to contain information responsive to U.S. EPA's Information Requests. This search included a review of all potentially relevant documents regarding the Thermark facility in Schererville, Indiana and the Soabar Coatings facility formerly located in Grand Rapids, Michigan. Avery similarly

attempted to identify employees who may have knowledge concerning any responsive information relative to the Site, and conducted interviews of such individuals. Despite these reasonable measures, and partly because the Agency's Information Requests address information that existed, if at all, many years ago, Avery does not possess any information that is fully responsive to certain requests. Where Avery does not fully respond to the Agency's individual requests, it is simply because their investigation did not generate information that is responsive to the requests.

By responding to these Information Requests, Avery is not admitting to liability or responsibility for the conditions at the Site and reserves the right to assert all claims and defenses available under law in any action or proceeding. Avery also generally objects to the Information Requests to the extent that they exceed the scope of U.S. EPA's statutory authority or are otherwise vague, ambiguous, overbroad, burdensome, unreasonable, arbitrary, or capricious. However, rather than object to the Agency's questions in their entirety, where necessary, Avery interpreted U.S. EPA's request in a manner consistent with the Agency's statutory authority, and tailored its responses accordingly. Avery similarly objects to the Agency's requirement that Avery supplement its responses as exceeding the scope of the Agency's statutory authority under CERCLA § 104(e). Without waiving this objection, however, Avery will take reasonable measures to provide to the Agency any subsequently discovered information as needed to ensure that the original responses are not inaccurate or misleading.

Subject to the considerations and understandings set forth above, Avery responds to the Information Requests as follows:

### **RESPONSES TO FIRST INFORMATION REQUESTS**

- 1. Identify all persons consulted in preparing the answers to these Information Requests.**

**Response:**

The following person(s) provided relevant information in the preparation of these responses. All of these employees are considered part of the corporation with regard to matters within the scope of their employment. As such, they should be considered represented by counsel for the corporation. All contact with these persons should be coordinated through and in the presence of counsel for Avery:

Bruce A. Martin  
Corporate – Senior Project Engineer  
Avery Dennison  
409 Fortune Boulevard  
Milford, MA 01757

Steve Gittens  
Fasson Group Environmental Affairs  
Manager  
Avery Dennison  
7590 Auburn Road  
Painesville, OH 44077

Carl Muehlmen  
Environmental Health & Safety Director  
Industrial & Automotive Products, N.A.  
Avery Dennison  
650 West 67<sup>th</sup> Avenue  
Schererville, IN 46375

In addition to the foregoing individuals, Avery received input from the following in-house legal counsel and outside legal counsel with regard to legal issues concerning the Information Requests:

Taras G. Szmagala, Esq.  
Sr. Division Counsel  
Avery Dennison Corporation  
Office of General Counsel  
7590 Auburn Rd.  
Painesville, Ohio 44077

Geoffrey K. Barnes, Esq.  
Squire, Sanders & Dempsey L.L.P.  
4900 Key Tower  
127 Public Square  
Cleveland, Ohio 44114-1304

2. **Identify all documents consulted, examined, or referred to in the preparation of the answers to these Information Requests and provide copies of all such documents.**

**Response:**

Avery objects to this question as overbroad and unduly burdensome. Avery has conducted a thorough review for all documents and information that may be relevant to the Site and this Request. In the course of this review, large numbers of documents were reviewed, the vast majority of which are not relevant to either the Site or this Request, and the identification of which would unnecessarily waste both the resources of Avery to provide and EPA to review. Without waiving this objection, Avery is providing copies of all documents found during its review that are relevant to the Site or were consulted to provide information responsive to these Information Requests. These documents are attached.

3. **If you have reason to believe that there may be persons able to provide a more detailed or complete response to any Information Request or who may be able to provide additional responsive documents, identify such persons.**

**Response:**

**Thermark:** Robert F. Roach, former Assistant Director of Manufacturing at Thermark (now retired), may have more detailed knowledge and/or information responsive to these Requests as he certified the generator information contained in the attached manifest documents.

**Soabar Coatings:** None. Those individuals that are in the best position to respond to these Information Requests have been identified in Response No. 1.

4. Identify all persons having knowledge or information about the generation, transportation, treatment, disposal or other handling of material at the Site.

**Response:**

Please refer to Response No. 3.

5. Identify all persons, including yourself, who may have arranged for disposal or treatment, or arranged for transportation for disposal or treatment, of waste materials, including hazardous substances, at the Site. In addition, identify the following:
- (A) For each transaction, the nature of the waste material or hazardous substance, including the chemical content, characteristics, physical state (e.g. solid, liquid), and the process for which the substance was used or the process which generated the substance;
  - (B) The quantity of the waste materials or hazardous substances involved (weight or volume) in each transaction and the total quantity for all transactions;
  - (C) All tests, analyses, and analytical results concerning the waste materials;
  - (D) The person(s) who selected the Site as the place to which the waste materials or hazardous substances were to be transported;
  - (E) What was actually done to the waste materials or hazardous substances once they were brought to the Site;
  - (F) The final disposition of each of the waste materials or hazardous substances involved in such transactions;
  - (G) The type and number of containers in which the waste materials or hazardous substances were contained when they were accepted for transport, and subsequently until they were accepted for transport, and subsequently until they were deposited at the Site, and all markings on such containers;

- (H) All documents containing information responsive to A-G above, or in lieu of identification of all relevant documents, provide copies of all such documents; and
- (I) All persons with knowledge, information, or documents responsive to A-H above.

**Response:**

**Thermark:** Robert F. Roach, former Assistant Director of Manufacturing at Thermark (now retired), may have more detailed knowledge and/or information responsive to these Requests as he certified the generator information contained in the attached manifest documents. In addition, the following information was obtained regarding transactions with the Site:

**December 15, 1981 transaction:**

(A) Liquid Paint Solvent & Resin (D001)

(B) Based on the available documents, the quantity of Thermark's waste delivered to Auburn for disposal appears to be no more than 76 "55-gallon" drums, or 4,180 gallons. There is a slight discrepancy in the estimated amounts contained in the 76 drums for this single shipment (with one reference in the documents to 3,800 gallons, and another to 4,180 gallons), which appears to be the result of using two different factors when converting drums to gallons (i.e., 50 gallons per drum, vs. 55 gallons per drum). In anycase, in the late 1980s a settlement agreement was entered into between potentially responsible parties from the Auburn/American Incineration, Inc. Superfund Site and U.S. EPA. Thermark's waste allocation for settlement purposes was 4,180 gallons, which accounts for the maximum possible volume of waste delivered to Auburn based on the available documents. Documents in Avery's possession relative to this issue are identified in Appendix A to these Responses and enclosed herewith.

(C) Avery's investigations did not result in any information responsive to this Request.

(D) Avery's investigations did not result in any information responsive to this Request.

(E) To the best of Avery's knowledge and belief, the waste materials were incinerated.

(F) To the best of Avery's knowledge and belief, the waste materials were incinerated.

(G) 76 drums, size unknown, marked as flammable

- (H) Please refer to documents identified in Appendix A to these Responses and enclosed herewith.
- (I) Robert Roach certified the generator information contained in all of the relevant manifest documents. Please also refer to Response No. 1.

**Soabar Coatings:** Avery's investigations did not result in any information regarding the identity of individuals who may have arranged for disposal or treatment, or arranged for transportation for disposal or treatment, of waste materials, including hazardous substances. However, the following information was obtained regarding transactions with the Site:

**April 27, 1982 transaction:**

- (A) Liquid Pigmented Polyurethane Elastomers (F005)

(B) 3,000 gallons. Soabar Coatings was also a settling party in the 1980s action involving the Auburn/American Incineration, Inc. Superfund Site and U.S. EPA. The 3,000 gallons of Soabar Coatings waste material were accounted for in this settlement. Documents in Avery's possession relative to Soabar's shipment of materials to the Auburn Site are identified in Appendix A to these Responses and enclosed herewith.

- (C) Avery's investigations did not result in any information responsive to this Request.
- (D) Avery's investigations did not result in any information responsive to this Request.
- (E) To the best of Avery's knowledge and belief, the waste materials were incinerated.
- (F) To the best of Avery's knowledge and belief, the waste materials were incinerated.
- (G) Single tank truck, markings unknown
- (H) Please refer to documents identified in Appendix A to these Responses and enclosed herewith.
- (I) Please refer to Response No. 1.

**RESPONSES TO SECOND INFORMATION REQUESTS**

1. Identify all persons consulted in preparing the answers to these Information

## **Requests.**

### **Response:**

Please refer to Response No. 1 to First Information Requests above.

2. **Identify all documents consulted, examined, or referred to in the preparation of the answers to these Information Requests and provide copies of all such documents.**

### **Response:**

Please refer to Response No. 2 to First Information Requests above.

3. **If you have reason to believe that there may be persons able to provide a more detailed or complete response to any Information Request or who may be able to provide additional responsive documents, identify such persons.**

### **Response:**

Please refer to Response No. 3 to First Information Requests above.

4. **Identify all persons, including yourself, who may have arranged with any of the following entities to dispose or treat, or arranged for transport for disposal or treatment, of waste materials, including hazardous substances, at the Paxton Lagoon portion of the Site: Steve Martell; Stryker International Inc.; Stryker International, Inc.; Paxton Avenue Lagoons; Paxton Lagoons. For each such transaction, identify:**
  - (A) **The nature of the waste material or hazardous substance, including the chemical content, characteristics, physical state (e.g. solid, liquid), and the process for which the substance was used or the process which generated the substance;**
  - (B) **The quantity of the waste materials or hazardous substances involved (weight or volume) in each transaction and the total quantity for all transactions;**
  - (C) **All tests, analyses, and analytical results concerning the waste materials;**
  - (D) **The person(s) who selected the Site as the place to which the waste materials or hazardous substances were to be transported;**

- (E) What was actually done to the waste materials or hazardous substances once they were brought to the Site;
- (F) The final disposition of each of the waste materials or hazardous substances involved in such transactions;
- (G) The type and number of containers in which the waste materials or hazardous substances were contained when they were accepted for transport, and subsequently until they were accepted for transport, and subsequently until they were deposited at the Site, and all markings on such containers;
- (H) All documents containing information responsive to A-G above, or in lieu of identification of all relevant documents, provide copies of all such documents; and
- (I) All persons with knowledge, information, or documents responsive to A-H above.

**Response:**

Avery's investigations did not result in any information responsive to this Request.

5. Identify all persons, including yourself, who may have arranged with any of the following entities to dispose or treat, or arranged for transport for disposal or treatment, of waste materials, including hazardous substances, at the Alburn Incinerator portion of the Site: Walter H. Anthonsen; Earth II Inc.; Cal Harbor Development Corp.; Cal Harbor Development and Disposal Corp.; Environmental Technology Assessment Inc.; Environmental Protection Corp.; Chemical Incineration Inc.; William Petrich; Environmental Clearinghouse Organization Inc.; Alburn Inc.; American Incineration Inc. For each such transaction, identify:
  - (A) The nature of the waste material or hazardous substance, including the chemical content, characteristics, physical state (e.g. solid, liquid), and the process for which the substance was used or the process which generated the substance;
  - (B) The quantity of the waste materials or hazardous substances involved (weight or volume) in each transaction and the total quantity for all transactions;
  - (C) All tests, analyses, and analytical results concerning the waste materials;

- (D) The person(s) who selected the Site as the place to which the waste materials or hazardous substances were to be transported;
- (E) What was actually done to the waste materials or hazardous substances once they were brought to the Site;
- (F) The final disposition of each of the waste materials or hazardous substances involved in such transactions;
- (G) The type and number of containers in which the waste materials or hazardous substances were contained when they were accepted for transport, and subsequently until they were accepted for transport, and subsequently until they were deposited at the Site, and all markings on such containers;
- (H) All documents containing information responsive to A-G above, or in lieu of identification of all relevant documents, provide copies of all such documents; and
- (I) All persons with knowledge, information, or documents responsive to A-H above.

**Response:**

Please refer to Response No. 5 to First Information Requests above.

- 6. Identify all persons, including yourself, who may have arranged with any of the following entities to dispose or treat, or arranged for transport for disposal or treatment, of waste materials, including hazardous substances, at the U.S. Drum portion of the Site: Anthony Tellis; Anthroplex Inc.; U.S. Drum & Disposal Company; Steve Martell. For each such transaction, identify:
  - (A) The nature of the waste material or hazardous substance, including the chemical content, characteristics, physical state (e.g. solid, liquid), and the process for which the substance was used or the process which generated the substance;
  - (B) The quantity of the waste materials or hazardous substances involved (weight or volume) in each transaction and the total quantity for all transactions;
  - (C) All tests, analyses, and analytical results concerning the waste materials;
  - (D) The person(s) who selected the Site as the place to which the waste

**materials or hazardous substances were to be transported;**

- (E) What was actually done to the waste materials or hazardous substances once they were brought to the Site;**
- (F) The final disposition of each of the waste materials or hazardous substances involved in such transactions;**
- (G) The type and number of containers in which the waste materials or hazardous substances were contained when they were accepted for transport, and subsequently until they were accepted for transport, and subsequently until they were deposited at the Site, and all markings on such containers;**
- (H) All documents containing information responsive to A-G above, or in lieu of identification of all relevant documents, provide copies of all such documents; and**
- (I) All persons with knowledge, information, or documents responsive to A-H above.**

**Response:**

Avery's investigations did not result in any information responsive to this Request.

## CONCLUSION

In closing, if the Agency maintains that any assumptions or interpretations made by Avery are unfounded, or that certain aspects of Avery's responses are incomplete, please notify Geoffrey K. Barnes at 216-479-8646 immediately to resolve the matter. Any communications from counsel representing U.S. EPA, as well as any contact by U.S. EPA with former employees of Avery, should be through Avery's counsel. Additionally, Avery requests that it be kept apprised of all developments and the results of U.S. EPA's investigation into this matter, and appreciates your cooperation in this regard.

Very truly yours,

A handwritten signature in cursive script that reads "Roberta Macklin".

Region V**

**July 1983**

## 1.0 SITE HISTORY

At this time the incinerator facility is owned by American Incineration, (also known as Professional Construction, Professional Sales, Inc., Haas Inc.) it is not accepting waste or incinerating waste that is on site. American Incineration gained possession of the facility in January 1983 from Alburn Inc., Professional Construction had done work at the site for Cal-Harbor Development, then owners and operators. Professional construction filed suit against Cal Harbor for nonpayment of bills, subsequently Cal Harbor leased the facility to Alburn Inc. in September 1978, then declared bankruptcy. Professional Construction pursued their suit charging that Cal Harbor and Alburn were one in the same. The Alburn Incinerator was ordered to shut down in late 1982, however Alburn continued to accept bulk and drummed waste until January 1983 when the court ruled in favor of Professional Construction (American Incineration) and Alburn was evicted.

American Incineration, the State of Illinois and the City of Chicago are attempting to have the waste generators remove their wastes from the site. The City sent letters to approximately 80 generators requesting their waste be removed. Many of the generators (according to the Illinois Attorney General's Office) have formed a committee to discuss the situation, a decision from this committee is not expected for many months. At this time 300,000 gallons of waste are stored in above and below ground tanks and approximately 6,500 drums of waste are on site.

In January 1982 Eugene Murphy, president of Alburn Inc. signed an agreement with the U.S. EPA to correct RCRA violations including maintaining a barrier to unauthorized entry at the boundary of the site. This was never completed. In addition the IEPA has noted that American Incineration has not established financial assurance for closure, does not have a written closure plan or a cost estimate for closure.

*Cooper*

## 2.0 SITE ASSESSMENT

On 16 June 1983 IEPA Specialist Cliff Gould and TAT member Kevin Pierard conducted an inspection of the Alburn/American Incineration site. The facility is located on 119th Street in Chicago on approximately 8 acres. The site is approximately 1/2 mile east of Lake Calumet and 3/5 of a mile north of the Calumet River. Wetlands southeast and east of the site are associated with the river. (Figure 1). The facility is located in a highly industrial area with Paxton Landfill to the north, West-southwest is Land and Lakes #3 Landfill, to the northwest is the S.C.A. Waste incinerator and to the east is the U.S. Drum site. Alburn itself is located on a previously filled area.

The inspection disclosed approximately 6,500 drums in good to poor condition, many of the drums showed signs of leakage. All of the drums, with few exceptions, are capped. Drums on the southwest and

west edge of the property have stood in up to one foot of water at times (according to the IEPA), however, at the time of this inspection the drum area was dry. Below ground storage tanks Q1 and Q2 were leaking from the top probably due to expansion from warm temperatures (Figure 2). The facility was emitting a very strong sweet odor. The aerial photo of the facility (attachment 1) taken by the IEPA on 10 January 1983 shows associated wetlands and also shows drums in water.

## SITE SURVEY

### 3.1 Drum Inventory

According to Alburn, most of the wastes on site are flammable. The following is a drum inventory submitted by Alburn on 7 December 1982.

#### 3.1.1 Ignitable Waste

<u>Generator</u>	<u>Waste</u>	<u>No. of Drums</u>
Signode	Paint	394

### 3.1.2 Waste Recovered From:

Roll-off Boxes	594 Drums	
Paint and Ink Scrapings	<u>631 Drums</u>	1,225

### 3.1.3 Solids from Cleanup of Bermed Areas

(dirt and gravel) 801

3.1.4 Empties 448

TOTAL INVENTORY 5,874  
Drums

### 3.2 Storage

Drums are stored in 10 separate areas, as follows:

<u>Area</u>	<u>Size</u>	<u>Storage</u>
A	52' x 47'	Flammable Liquids
B	56' x 47'	Flammable Liquids
C	48' x 47'	Flammable Liquids
D	92' x 48'	Flammable Liquids
E	116' x 48'	Flammable Liquids
F	77' x 48'	Flammable Liquids
G	54' x 41'	Flammable Liquids
H	85' x 48'	Flammable Liquids
ZZ	48' x 48'	Isocyanates
Empty Drum Area	57' x 48'	Empty Drums

Bulk Materials are stored in 33 storage tanks, as follows:

<u>Tank</u>	<u>Capacity</u>	<u>Usage</u>
A1	4,500 gals.	Storage & blending before burning
A2	4,500 gals.	Storage & blending before burning.
A3	500 gals.	Fuel oil storage
I1	unknown	Empty
M1	3,000 gals.	Bulk unloading, staging
M2	3,000 gals.	Bulk unloading, staging
M3	3,000 gals.	Bulk unloading, staging
M4	5,000 gals.	Bulk unloading, staging
M5	15,000 gals.	Bulk unloading, staging

M6	15,000 gals.	Bulk unloading, staging
Q1	12,000 gals.	Flammable storage, and blending.
Q2	12,000 gals.	Flammable storage and blending.
Q3	10,000 gals.	Flammable storage, and blending.
Q4	10,000 gals.	Flammable storage and blending.
Q5	10,000 gals.	Flammable storage and blending.
Q6	10,000 gals.	Flammable storage and blending.

T9	15,000 gals.	Flammable storage
T10	10,000 gals.	Flammable storage
T11	10,000 gals.	Flammable storage
W1	12,000 gals.	Water storage (contains waste)
W2	12,000 gals.	Water storage (contains waste)
Z1	15,000 gals. apprx.	full of unknown material
Z2	8,000 gals. apprx.	full of unknown material

(See Figure 2 for locations)

#### 4.0 RESPONSIBLE PARTIES

Alburn/Cal-Harbor Development is responsible for the wastes on site, since the acquisition by American Incineration no waste appears to have been brought on site, however, American Incineration does own the site. As of this date American Incineration/Professional Construction has filed for bankruptcy to reorganize. Alburn Inc. appears to be solvent.

Illinois has compiled a list from manifests of wastes brought to the facility, including generators and quantities, between 8 January 1982 and 19 November 1982, however, The operating record which would indicate what happened to these wastes has not been obtained.

Illinois feels confident that generators can be identified from markings on many of the drums and they believe the generators listed by Alburn on the 7 December 1982 inventory is fairly accurate. If this is the case, many generators can be held responsible for their own drummed waste. The manifested waste which cannot be located in drums may be in the bulk tanks; however, wastes in the bulk tanks are mixed with other wastes prior to incineration making identification of generators of the bulk material unlikely.

#### 5.0 SAMPLING

Very few samples were taken from the site by the IEPA. One sample was taken from the area around tanks T5, T6, and T7. This material was a saturated soil. Analysis indicated a flash point of 74°F. This material was reported to have been removed and placed in drums which are still on site. The IEPA recently took soil samples from 9 locations on the site however analysis have not been completed.

#### 6.0 HEALTH AND ENVIRONMENTAL HAZARDS

Most of the wastes on site are flammable according to Alburn, and there is no site restriction. Site conditions represent a serious threat to human health and the environment. The fire hazard and associated fumes may represent the most serious and imminent threat, not only to workers at surrounding facilities but also to residents nearest to the facility through inhalation of toxic fumes.

There is also a potential for direct contact due to the lack of any type of barrier on the perimeter of the site.

Contamination of surface waters and migration of contaminants through surface water and subsurface migration have undoubtedly occurred and will undoubtedly occur again if no steps are taken.

#### 7.0 RECOMMENDED IMMEDIATE ACTIONS

Immediate actions on this site should include removal of bulk and

Any waste materials on the ground should be removed during this phase, No estimate can be made of the quantities of these wastes.

#### 7.1.5 Unincinerable Waste in Bulk Tanks

<u>Tank</u>	<u>Contents</u>	<u>Capacity</u>	<u>Liquid</u>	<u>Sludge</u>
M5	Sludge and water	15,000	7,500	7,500
M6	Sludge and water	15,000	7,500	7,500
Q1	1/2 usable, 1/2 sludge	12,000	6,000	6,000
Q2	1/2 usable, 1/2 sludge	12,000	6,000	6,000

Q6	3/4 usable, 1/4 sludge	10,000	7,500	2,500
UN	3/4 usable, 1/4 sludge	10,000	7,500	2,500
US	3/4 usable, 1/4 sludge	10,000	7,500	2,500
P2	Sludge	10,000	---	10,000
P3	Water & Sludge	10,000	5,000	5,000
T1	Not in use(1)	2,000	---	2,000
T2	Grease	18,000	---	18,000
T3	Not in use(1)	5,000	---	5,000
T4	Not in use(1)	2,000	---	2,000
T5	Grease	10,000	---	10,000
T6	Grease	10,000	---	10,000
T7	1/2 Hot solvent, 1/2 H <sub>2</sub> O	10,000(2)	5,000	---
T8	Watery sludge	15,000	---	15,000
T9	Watery sludge	15,000	---	15,000
T10	Watery Sludge	10,000	---	10,000
T11	Watery sludge	10,000	---	10,000
W1	(3)	12,000	3,000	---
W2	(3)	12,000	12,000	---
Z1	Unknown(4)	15,000	7,500	7,500
Z2	Unknown(4)	8,000	4,000	4,000
<u>TOTALS</u>		283,000	103,500	170,500

#### NOTES:

- (1) Although these tanks are indicated as not being in use, they do have waste in them.
- (2) The remaining 5,000 gals. is considered burnable.
- (3) Although the inventory indicates that these tanks have water in them, they contain waste. Tank W1 contains 9,000 gals. of burnable waste, and this 9,000 gals. has been included in the total of burnable waste in bulk tanks, which accounts for the 9,000 gal. discrepancy between the capacity and the sum of the liquid and sludge amounts.
- (4) These tanks are not on the inventory list. The sizes are approximates and they are full of unknown waste assumed to be 50% sludge and 50% liquid which is unburnable.

drummed waste and scrubber water, the total being approximately 800,000 gallons. Testing and removal of some contaminated soils will have to be completed after the initial cleanup.

#### 7.1 Removal and Disposal of Incinerable Wastes

The first phase of an immediate removal should be to remove incinerable wastes from the bulk storage tanks (approx. 37,500 gal.) and drums (approx. 188,015 gal) totaling 225,515 gallons. This material may be transported in bulk to a permitted hazardous waste incinerator. An analysis of each load must be performed to insure that it is incinerable (in regard to incinerator specifications) and to check its PCB content. Compatibility tests will have to be performed before the wastes are bulked. The following is an estimated inventory of burnable wastes on site (from the IEPA):

##### 7.1.1 Burnable Wastes in Tanks

<u>Tank</u>	<u>Contents</u>	<u>Capacity</u>	<u>Burnable</u>
A1	Fuel Blend	4,500 gals.	4,500 gals.
A2	Fuel Blend	4,500	4,500
A3	#3 Fuel Oil	500	500
M1	Solvent	3,000	3,000
M2	Solvent	3,000	3,000
M3	Solvent	3,000	3,000
M4	Adhesive	5,000	5,000
T7	1/2 Solvent 1/2 water	10,000	5,000
W1	Waste	12,000	9,000
TOTALS		45,500	37,500

##### 7.1.2 Burnable Waste in Drums/Pails

Drums	3400 X 55 gal. =	187,000
Pails	203 X 5 gal. =	1,015
	Total gallons	188,015

##### 7.1.3 Total Burnable Waste

Tanks	37,500
Drums/Pails	188,015
Total burnable wastes	225,515 gallons

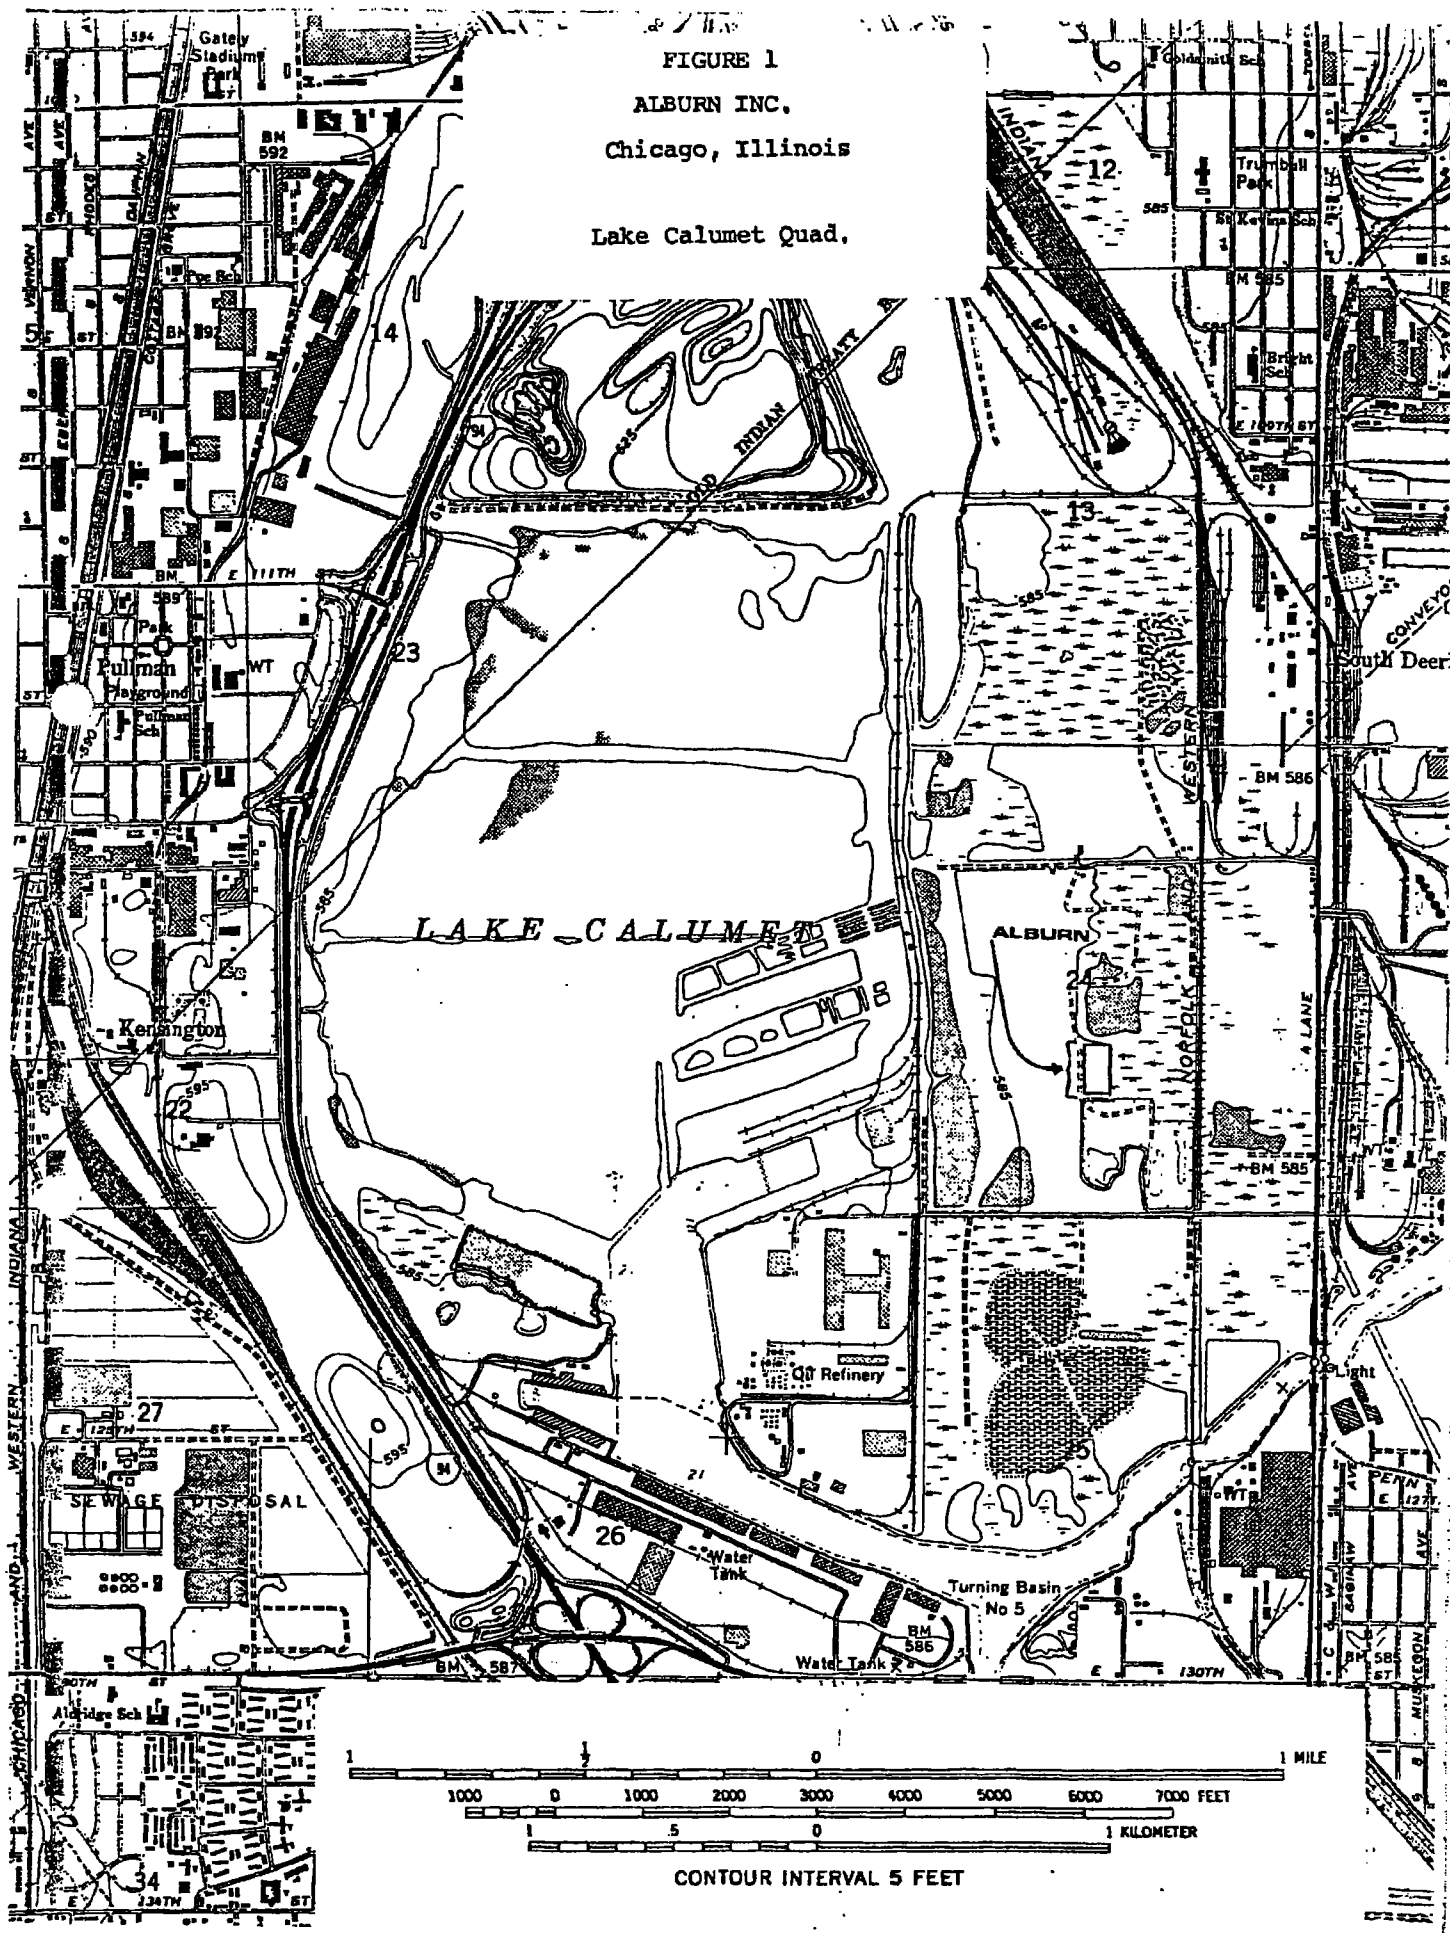

##### 7.1.4 Removal of Unincinerable Waste

The second phase will be to remove unincinerable wastes (<sup>385,430</sup>~~262,430~~ gal.) and scrubber water (210,000 gal.) to be solidified and landfilled.

CHEMICAL DATA SHEETS

**WESTERN-SUPER**

CHEMICAL DATA SHEET

Chemical Name: Toluene 2,4-Diisocyanate (Hylene T, Mondur TDS, Nacconate 100,TDI)

DOT Name: None

DOT Placard Number: None

Chemical Formula: 1-CH<sub>3</sub>C<sub>6</sub>H<sub>3</sub>(NCO)<sub>2</sub>-2,4

Boiling Pt: 428° F

Physical State: Liquid

Freezing Pt: 68-72°F

Molecular Weight: 174.16

Flash Pt: 270°

Vapor Pressure: \_\_\_\_\_

Flammable Limits: .9-9.5%

Specific Gravity: 1.22 at 25°F

Melting Pt: \_\_\_\_\_

Solubility: Water: insoluble  
Oil: Soluble

Alcohol: Soluble  
Other: Acetone, Benzene, Kerosene.

TLV: .02ppm

Odor Threshold: .4-2.14ppm

LD50: .5 to 5g/kg

Reactivity: Reacts with water - yields CO<sub>2</sub>

Neutralization: Fire Fighting: Water, foam , Dry chemical, or CO<sub>2</sub>

Toxic Information/Health Hazards: Inhalation: Remove victim to fresh air administer artificial respiration and O<sub>2</sub> , Ingestion: Donot induce vomiting. Eyes: Flush with water for 15 min. Skin: Flush with water and alcohol.

NB:1

**WESTON-SPER**

CHEMICAL DATA SHEET

Chemical Name: Toluene ( Methylbenzene, Phenylmethane )

DOT Name: Flammable Liquid

DOT Placard Number: 1294

Chemical Formula: C<sub>6</sub>H<sub>5</sub>CH<sub>3</sub>

Boiling Pt: 110.7°C

Physical State: Colorless Liquid

Freezing Pt: -94°C

Molecular Weight: 92

Flash Pt: 40°F (4.4°C)

Vapor Pressure: 36.7 mm @ 30°

Flammable Limits: Will Burn, May Ignite

Specific Gravity: 0.866

Melting Pt: \_\_\_\_\_

Solubility: Water: Insol.

Alcohol: Yes

Oil: Benzene

Other: Ether

TLV: 200 ppm in air  
IDLH: 200 ppm

Odor Threshold: Vapor heavier than air.

LD50:

Reactivity: Stable

Neutralization: Fire Fighting: Use foam, CO<sub>2</sub>, or dry chemical.

**Toxic Information/Health Hazards:**

Explosion Hazard (explosive limits in air 1.27-7%). Highly flammable. Avoid exposure to heat or flame. Avoid exposure to oxidizers. Keep in well ventilated area.

NB:1

Chemical Name: Xylene ( 1,3-Dimethylbenzene, Xylol )

DOT Name: Flammable Liquid

DOT Placard Number: 1307

Chemical Formula: C<sub>6</sub>H<sub>4</sub>(CH<sub>3</sub>)<sub>2</sub>

Boiling Pt: 131.9°C

Physical State: Colorless Liquid

Freezing Pt: -47.9°C

Molecular Weight: 106.16

Flash Pt: 84°F

Vapor Pressure: 10mm @28.3°

Flammable Limits: 1.1%-6.4%

Specific Gravity: 0.864

Melting Pt: \_\_\_\_\_

Solubility: Water: Insoluble  
Oil: slightly soluble

Alcohol: Soluble  
Other: Soluble in many Organic Liquids.

TLV: 100 ppm

Odor Threshold: .05 ppm - heavier than air

LD50: 5000ppm

Reactivity: Stable

Neutralization: Fire Fighting: Foam, CO<sub>2</sub>, Dry Chemical.

Toxic Information/Health Hazards: Explosion Hazard (explosive limits in air 1.1-6.4%) Highly flammable. Avoid exposure to heat or flame. Wear appropriate respiratory equipment. Avoid exposure to oxidizers. Keep in well ventilated area.

NB:1

Chemical Name: Phenol (carbolic acid, Hydroxbenzene, Phenic acid, Phenyl hydroxide)

DOT Name: Poison

DOT Placard Number: 1671

Chemical Formula: C<sub>6</sub>H<sub>5</sub>OH

Boiling Pt: 182°C

Physical State: solid or liquid

Freezing Pt: 41°C

Molecular Weight: 94.11

Flash Pt: 79°C

Vapor Pressure: \_\_\_\_\_

Flammable Limits: 1.7-8.6%

Specific Gravity: 1.058 at 41°C

Melting Pt: 43°

Solubility: Water: Soluble  
Oil: Soluble

Alcohol: Soluble  
Other: Benzene, Chloroform  
Ether, Glycol, Carbondisulfide

TLV: 5ppm (includes skin exposure)

Odor Threshold: .05ppm

LD50: .5 to 5 g/kg (rats)

Reactivity: Not reactive

Neutralization: Fire fighting: water, foam, CO<sub>2</sub>, or dry chemical.

Toxic Information/Health Hazards: Yields flammable vapors when heated, will form explosive mixtures with air. Inhalation, ingestion and skin absorption hazards, wear SCBA and rubber overclothing.

NB:1

RECEIVED

OFFICE OF ENFORCEMENT  
AND COMPLIANCE  
MONITORING

OCT 9 1986

Honorable F. Henry Habicht II  
Assistant Attorney General  
Land and Natural Resources Division  
U.S. Department of Justice  
Washington, D.C. 20530

U.S. EPA REGION 5  
OFFICE OF REGIONAL ADMINISTRATOR

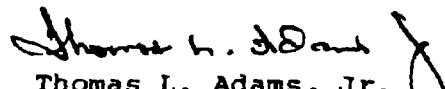

Re: Alburn/American Incineration, Inc., Chicago, Illinois,  
Administrative Settlement

Dear Mr. Habicht:

This office has reviewed the enclosed administrative settlement, referenced above, negotiated by our Region V office. They request concurrence on this claim compromise, the settlement of which is based on Section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). EPA performed an emergency cleanup of the Alburn site between July and November of 1983. Thousands of drums of flammable hazardous liquids were removed, along with removal of 36 bulk tanks, proper disposal of the contents of the tanks, dismantling of scrubber water pits, and installation of a security fence.

I concur with Region V's judgment that this administrative settlement/claim compromise is an appropriate one under the circumstances. The settlement requires 325 potentially responsible parties to reimburse the Agency for \$1,150,000.00 of past response costs. Region V values this as more than an 88% settlement. The return to the Fund of money expended for an emergency removal at a non-NPL site is an important element of EPA's cost recovery program. I concur with Region V's recommendation that the settlement be approved, and request that you approve the proposed claim compromise for the Alburn site. Please have someone on your staff notify Frederick Stiehl (382-3050) when you have reached a decision on this matter.

Sincerely,

  
Thomas L. Adams, Jr.  
Assistant Administrator

COVENANT NOT TO SUE

This COVENANT NOT TO SUE is made and entered into by and between the United States Environmental Agency (EPA) and the parties named in Attachment A (Settling Parties).

WHEREAS, pursuant to section 104 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), 42 U.S.C. §9604, EPA responded to a release or substantial threat of a release of hazardous substances, pollutants and contaminants into the environment from a facility occupying approximately eight acres located at 119th Street, Chicago, Illinois (Alburn Site); and

WHEREAS, the EPA, pursuant to the authority delegated it by the President, acted to remove and arranged for removal of such hazardous substances, pollutants and contaminants, and took other response measures which were not inconsistent with the National Contingency Plan (NCP), and which were deemed necessary to protect the public health or welfare or the environment at the Alburn Site pursuant to Section 104 of CERCLA; and

WHEREAS, Section 107 of CERCLA provides in part, subject to the defenses contained therein, that:

- (1) the owner and operator of a vessel (otherwise subject to the jurisdiction of the United States) or a facility,
- (2) any person who at the time of disposal of any hazardous substance owned or operated any facility at which such hazardous substances were disposed of,
- (3) any person who by contract, agreement or otherwise arranged for disposal or treatment, or arranged with a transporter for transport for disposal or treatment, of hazardous substances owned or possessed by such person, by any other party or entity, at any facility owned or operated by another party or entity and containing such hazardous substances, and
- (4) any person who accepts or accepted any hazardous substances for transport to disposal or treatment facilities or sites selected by such person, from which there is a release, or a threatened release which causes the incurrence of response costs, of a hazardous substance, (42 U.S.C. §9607 (a))

shall be liable for all costs of removal or remedial action incurred by the United States Government which are not inconsistent with the NCP; and

WHEREAS, EPA and the Settling Parties desire to resolve the liability of the Settling Parties with respect to the response action undertaken by EPA in connection with the Alburn Site to the date of EPA's signature of this Covenant, but not to discharge in any manner non-settlers from liability with respect to such response actions, and

WHEREAS, EPA and the Settling Parties recognize and hereby intend to further the public interest in avoiding prolonged and complicated litigation between the parties and in expediting the recovery of costs incurred by EPA at the Alburn Site, to the date of EPA's signature of this Covenant, pursuant to Section 104 and Section 107 of CERCLA; and

WHEREAS, it is the intention of EPA to retain its legal right to seek additional relief from the Settling Parties for costs incurred by the United States at the Alburn Site subsequent to the date of EPA's signature of this Covenant; and for past and future costs incurred by the United States at any other site for materials removed from the Alburn Site during EPA's response action and for injunctive or other relief to which EPA may be entitled at law or equity arising out of any occurrence resulting from the presence of those materials at any such other site; and

WHEREAS, the Settling Parties, by the execution of this document, do not admit any issues of fact or law or any liability or responsibility for the alleged release or substantial threat of release of a hazardous substance into the environment at the Alburn Site or for any alleged release or substantial threat of release of a hazardous substance into the environment with respect to materials removed from the Alburn Site during EPA's response action..

THEREFORE, in consideration of and in exchange for the promises, agreements, and mutual undertakings herein and intending to be legally bound hereby, the Settling Parties and EPA agree as follows:

1. The Settling Parties shall issue or cause to be issued one certified or cashier's check in the amount of One Million, One Hundred Fifty Thousand Dollars (\$1,150,000) payable to the "Hazardous Substance Response Trust Fund", within fourteen (14) days of the date of EPA's execution of this Covenant Not To Sue. Said check shall specifically identify the Alburn Site as the Alburn/American Incineration Site and be addressed to:

U.S. Environmental Protection Agency  
Superfund Accounting  
P.O. Box 371003M  
Pittsburgh, PA 15251

Copies of the transmittal letter and check must be sent to each of the following:

- a. CERCLA Enforcement Section (5HE-12);
- b. Financial Accounting Section (5MF-14);
- c. Office of Regional Counsel (5CS-16)  
Attention: SWERB Branch Secretary;

at the address below:

U.S. Environmental Protection Agency  
Region V  
230 South Dearborn  
Chicago, Illinois 60604

2. Each of the Settling Parties shall pay into the Settling Parties' Alburn Site Escrow Account the sum that is shown for the Settling Party in Exhibit A hereto. Such payment by each of the Settling Parties is not a penalty or monetary sanction. The Settling Parties' Escrow Agent shall use the funds in the Settling Parties' Alburn Site Escrow Account to pay \$1,150,000 to EPA as specified in paragraph 1 above.

3. Upon receipt by EPA of \$1,150,000, EPA covenants not to bring any civil judicial or administrative action or proceeding against the Settling Parties or their officers, directors, or employees for any claim or cause of action relating to the response action taken with respect to the Alburn Site to the date of execution of this document by EPA. This Covenant shall not be construed to impair, limit, or prohibit the legal right of the EPA to seek additional relief from the Settling Parties for costs incurred by the United States with reference to the Alburn Site subsequent to the date of EPA's signature of this Covenant, for natural resource damage claims or for past and future costs incurred by the United States at any other site for materials removed from the Alburn Site during EPA's response action and for injunctive or other relief to which EPA may be entitled at law or equity arising out of any occurrence resulting from the presence of those materials at any such other site.

4. The Settling Parties do not admit any legal right of EPA to seek or recover relief from the Settling Parties for any costs incurred by the United States with reference to the Alburn Site subsequent to the date of EPA's signature of this Covenant, for natural resource damage claims or for past and future costs incurred by the United States at any other site for materials removed from the Alburn Site during EPA's response action or for injunctive or other relief at law or equity arising out of any occurrence resulting from the presence of those materials at any other such site.

5. EPA and the Settling Parties represent that this Covenant was negotiated in good faith and that the Settling Parties' payment represents a more than fair and equitable assumption of the Settling Parties' alleged responsibilities for past response actions at the Alburn Site considering, among other factors, the fact that it is in the best interest of EPA to encourage equitable settlements without burdensome litigation. EPA and the Settling Parties, for purposes of this matter, agree that (i) federal law should govern questions of contribution; (ii) this Covenant does not discharge any non-settling party from liability, but it reduces the claims of EPA against non-settling parties to the extent of

this recovery of EPA; and (iii) the Settling Parties are not liable for contribution to any non-settling party.

6. EPA and the Settling Parties recognize the possibility that persons that have not agreed to this Covenant Not to Sue may bring or assert against the Settling Parties suits or claims for contribution for liability concerning matters within the scope of this Covenant Not to Sue and that, if successful, such suits or claims could obligate the Settling Parties to pay amounts in addition to the amount specified in Attachment A for such matters. It is the expressed intention of EPA and the Settling Parties that the Settling Parties not be required to pay amounts in contribution for such matters or be required to remain as parties in any suit or claim for contribution concerning any matters within the scope of this Covenant. It is also agreed that EPA shall be under no obligation to defend the Settling Parties in any such suits or claims. Therefore, if as a result of any action brought by the United States against a non-settling party with respect to work done by EPA at the Alburn Site, any court of competent jurisdiction enters a final judgment requiring one or more of the Settling Parties to pay an amount for matters within the scope of this Covenant, then the United States agrees to adjust the amount of any such judgment(s) obtained against any non-settling party(s) in such action so that none of the Settling Parties shall be required to pay all or any part of said amount.

7. EPA and the Settling Parties agree that the Covenant Not to Sue contained herein shall be construed as a Covenant Not to Sue only as between EPA and the Settling Parties.

8. EPA and the Settling Parties reserve all rights that each may have to assert claims against non-settling parties arising out of the Alburn Site or its operation and ownership, including without limitation claims for breach of contract, tortious conduct, indemnity, contribution, nuisance, and claims under applicable federal, state and local laws. EPA or any of the Settling Parties may covenant not to sue other parties for liability pertaining to the payment of EPA's response costs to the date of the execution of this covenant. It is agreed that any such covenant not to sue shall not be binding on any party not a signatory thereto and shall not provide any general or special release from said liability within the meaning of Illinois law.

9. Each of the Settling Parties agrees not to assert any causes of action, claims or demands against EPA or the Hazardous Substance Response Trust Fund with regard to expenses incurred by the respective Settling Parties at the Alburn Site to the date of EPA's signature to this Covenant, without impairing or affecting the claims of the Settling Parties against any other person, firm or corporation in connection with the Alburn Site.

10. Each of the Settling Parties agrees to timely notify EPA of the institution of any suit or claim for contribution brought by it against a non-settling party.

11. EPA and Settling Parties agree that they will preserve for three years following the execution of this Covenant, all records and documents in their possession and in the possession of any of their subsidiaries, divisions, parents, affiliates or their respective directors, officers, employees, agents, accountants, or attorneys, which relate to any transactions or business with, or relate in any other way to the response action at the Alburn Site, despite any document retention policy to the contrary. Notwithstanding any other provision of this Covenant, EPA and the Settling Parties retain whatever rights they may have under applicable statutes and regulations governing the retention of records and documents which are the subject matter of this paragraph.

12. This Covenant applies to and is binding upon EPA and the undersigned parties and their successors and assigns. Each undersigned representative of the parties to this Covenant certifies that he or she is fully authorized to enter into the terms and conditions of this Covenant and to execute and to legally bind such party to this Covenant.

13. In the event that the Settling Parties fail to make payment as specified herein, this covenant shall be null and void.

14. The terms of this Covenant Not to Sue are effective upon execution by EPA.

15. This Covenant Not to Sue may be executed in duplicate counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

EPA and the Settling Parties execute this Covenant by their duly authorized representative.

Re: Alburn/American Incineration Superfund Site

Dear Potentially Responsible Party:

Enclosed please find a Covenant Not To Sue negotiated between the Alburn Generators Steering Committee (Steering Committee) and Region V of the United States Environmental Protection Agency (U.S. EPA). This Covenant represents a settlement of U.S. EPA's claim for reimbursement of costs against generators of waste sent to the Alburn/American Incineration site. You have until June 6, 1986, to respond to this letter.

Your response must consist of a firm commitment by your Company to participate in the settlement or advice to the Steering Committee that your Company will not participate. A failure to respond will be considered as an indication of your intention not to participate. We have enclosed a commitment form to facilitate your response. Do not execute or return the Covenant Not To Sue, and do not send money at this time.

The Steering Committee believes the enclosed Covenant Not To Sue represents the best settlement obtainable from U.S. EPA short of protracted and costly litigation. Accordingly, we recommend that your Company participate in this settlement.

#### Background

The settlement and Covenant Not To Sue provide that the settling companies will pay \$1.15 million into the U.S. EPA Hazardous Substance Response Trust Fund. In consideration for this payment, U.S. EPA will covenant not to sue (or release) the settling companies from any claim or cause of action relating to response actions taken at the Alburn site prior to the effective date of the covenant. U.S. EPA also will provide contribution protection for settling parties.

U.S. EPA and the settling companies have expressly reserved all rights to assert claims for cost recovery, contribution, breach of contract, and other causes of action against any non-settling company. However, at the time of execution of the settlement documents, the settling companies will sign a Mutual Covenant Not To Sue which will state that the settling companies agree not to sue each other for non-contractual claims connected with the Alburn site. Claims by settling generators against their transporters will be preserved.

The settlement agreement reflects the results of protracted and difficult negotiations with U.S. EPA. U.S. EPA has advised the Steering Committee that the matter has already been referred to the U.S. Department of Justice. If we are unable to raise the \$1.15 million required to consummate the settlement, U.S. EPA's claim will be prosecuted against all generators by the Justice Department.

The Steering Committee was able to win a reduction in U.S. EPA's claim from over \$1.3 million to \$1.15 million. We also have negotiated a release for all claims related to response actions taken with respect to the Alburn site to the date of execution of the settlement agreement. Finally, the U.S. EPA conceded contribution protection, a point it was initially unwilling to compromise. The settlement does not include a release from liability for waste removed and manifested by U.S. EPA and shipped to other sites. While the Steering Committee had hoped to gain such a release, we are convinced that as a matter of policy, Region V of U.S. EPA will not grant such a release at any site under any circumstances. In order to protect the settling parties to the extent possible, the Covenant Not To Sue does recognize that the settling companies do not admit any liability for wastes shipped from the Alburn site.

#### Procedure

The Steering Committee intends to raise the \$1.15 million settlement amount in two steps. First, attached to this letter is a binding "Commitment Form." You are asked to sign this form and commit your Company to participation or non-participation in the settlement. As you will note, the Commitment Form Attachment sets forth the fixed settlement costs for small generators, based on volumetric share of waste-in. For large generators, a minimum and maximum settlement is given based on waste-in and a participation range between 60 and 100%. By agreeing to participate, you are obligating your Company to pay some amount within the specified range. The final costs to each settling large generator will be calculated after the binding participation commitments are received by the Steering Committee. As noted above, we must receive your Commitment Form by June 6, 1986.

Second, if the Steering Committee receives commitments equalling or exceeding \$1.15 million, we will notify you of your Company's precise required contribution. For small generators, this amount will be the same as set forth in the attached list. For large generators, this amount will be within the applicable range. At that time, you will be expected to tender a check for the settlement amount specified as well as \$75 for the Administrative Fund, unless previously paid. You must also execute and return the Covenant Not To Sue between U. S. EPA and the settling companies which will be furnished to you, and a Mutual

Covenant Not To Sue between the settling parties. You will be informed of where to send your contribution and documents and of the deadline for receipt in the next communication. If the Steering Committee does not receive commitments for \$1.15 million then you will be informed as will U.S. EPA, and we can expect immediate action by the Justice Department.

Please be advised that this settlement does not resolve or affect in any way the claim for further cleanup at the Alburn site made by the State of Illinois.

If you have questions regarding this matter, please contact:

## COVENANT NOT TO SUE

This COVENANT NOT TO SUE is made and entered into by and between the United States Environmental Agency (EPA) and the parties named in Attachment A (Settling Parties).

WHEREAS, pursuant to section 104 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), 42 U.S.C. §9604, EPA responded to a release or substantial threat of a release of hazardous substances, pollutants and contaminants into the environment from a facility occupying approximately eight acres located at 119th Street, Chicago, Illinois (Alburn Site); and

WHEREAS, the EPA, pursuant to the authority delegated it by the President, acted to remove and arranged for removal of such hazardous substances, pollutants and contaminants, and took other response measures which were not inconsistent with the National Contingency Plan (NCP), and which were deemed necessary to protect the public health or welfare or the environment at the Alburn Site pursuant to Section 104 of CERCLA; and

WHEREAS, Section 107 of CERCLA provides in part, subject to the defenses contained therein, that:

- (1) the owner and operator of a vessel (otherwise subject to the jurisdiction of the United States) or a facility,
- (2) any person who at the time of disposal of any hazardous substance owned or operated any facility at which such hazardous substances were disposed of,
- (3) any person who by contract, agreement or otherwise arranged for disposal or treatment, or arranged with a transporter for transport for disposal or treatment, of hazardous substances owned or possessed by such person, by any other party or entity, at any facility owned or operated by another party or entity and containing such hazardous substances, and
- (4) any person who accepts or accepted any hazardous substances for transport to disposal or treatment facilities or sites selected by such person, from which there is a release, or a threatened release which causes the incurrence of response costs, of a hazardous substance, (42 U.S.C. §9607 (a))

shall be liable for all costs of removal or remedial action incurred by the United States Government which are not inconsistent with the NCP; and

WHEREAS, EPA and the Settling Parties desire to resolve the liability of the Settling Parties with respect to the response action undertaken by EPA in connection with the Alburn Site to the date of EPA's signature of this Covenant, but not to discharge in any manner non-settlers from liability with respect to such response actions, and

WHEREAS, EPA and the Settling Parties recognize and hereby intend to further the public interest in avoiding prolonged and complicated litigation between the parties and in expediting the recovery of costs incurred by EPA at the Alburn Site, to the date of EPA's signature of this Covenant, pursuant to Section 104 and Section 107 of CERCLA; and

WHEREAS, it is the intention of EPA to retain its legal right to seek additional relief from the Settling Parties for costs incurred by the United States at the Alburn Site subsequent to the date of EPA's signature of this Covenant; and for past and future costs incurred by the United States at any other site for materials removed from the Alburn Site during EPA's response action and for injunctive or other relief to which EPA may be entitled at law or equity arising out of any occurrence resulting from the presence of those materials at any such other site; and

WHEREAS, the Settling Parties, by the execution of this document, do not admit any issues of fact or law or any liability or responsibility for the alleged release or substantial threat of release of a hazardous substance into the environment at the Alburn Site or for any alleged release or substantial threat of release of a hazardous substance into the environment with respect to materials removed from the Alburn Site during EPA's response action..

THEREFORE, in consideration of and in exchange for the promises, agreements, and mutual undertakings herein and intending to be legally bound hereby, the Settling Parties and EPA agree as follows:

1. The Settling Parties shall issue or cause to be issued one certified or cashier's check in the amount of One Million, One Hundred Fifty Thousand Dollars (\$1,150,000) payable to the "Hazardous Substance Response Trust Fund", within fourteen (14) days of the date of EPA's execution of this Covenant Not To Sue. Said check shall specifically identify the Alburn Site as the Alburn/American Incineration Site and be addressed to:

U.S. Environmental Protection Agency  
Superfund Accounting  
P.O. Box 371003M  
Pittsburgh, PA 15251

Copies of the transmittal letter and check must be sent to each of the following:

- a. CERCLA Enforcement Section (5HE-12);
- b. Financial Accounting Section (5MF-14);
- c. Office of Regional Counsel (5CS-16)  
Attention: SWERB Branch Secretary;

at the address below:

U.S. Environmental Protection Agency  
Region V  
230 South Dearborn  
Chicago, Illinois 60604

2. Each of the Settling Parties shall pay into the Settling Parties' Alburn Site Escrow Account the sum that is shown for the Settling Party in Exhibit A hereto. Such payment by each of the Settling Parties is not a penalty or monetary sanction. The Settling Parties' Escrow Agent shall use the funds in the Settling Parties' Alburn Site Escrow Account to pay \$1,150,000 to EPA as specified in paragraph 1 above.

3. Upon receipt by EPA of \$1,150,000, EPA covenants not to bring any civil judicial or administrative action or proceeding against the Settling Parties or their officers, directors, or employees for any claim or cause of action relating to the response action taken with respect to the Alburn Site to the date of execution of this document by EPA. This Covenant shall not be construed to impair, limit, or prohibit the legal right of the EPA to seek additional relief from the Settling Parties for costs incurred by the United States with reference to the Alburn Site subsequent to the date of EPA's signature of this Covenant, for natural resource damage claims or for past and future costs incurred by the United States at any other site for materials removed from the Alburn Site during EPA's response action and for injunctive or other relief to which EPA may be entitled at law or equity arising out of any occurrence resulting from the presence of those materials at any such other site.

4. The Settling Parties do not admit any legal right of EPA to seek or recover relief from the Settling Parties for any costs incurred by the United States with reference to the Alburn Site subsequent to the date of EPA's signature of this Covenant, for natural resource damage claims or for past and future costs incurred by the United States at any other site for materials removed from the Alburn Site during EPA's response action or for injunctive or other relief at law or equity arising out of any occurrence resulting from the presence of those materials at any other such site.

5. EPA and the Settling Parties represent that this Covenant was negotiated in good faith and that the Settling Parties' payment represents a more than fair and equitable assumption of the Settling Parties' alleged responsibilities for past response actions at the Alburn Site considering, among other factors, the fact that it is in the best interest of EPA to encourage equitable settlements without burdensome litigation. EPA and the Settling Parties, for purposes of this matter, agree that (i) federal law should govern questions of contribution; (ii) this Covenant does not discharge any non-settling party from liability, but it reduces the claims of EPA against non-settling parties to the extent of

this recovery of EPA; and (iii) the Settling Parties are not liable for contribution to any non-settling party.

6. EPA and the Settling Parties recognize the possibility that persons that have not agreed to this Covenant Not to Sue may bring or assert against the Settling Parties suits or claims for contribution for liability concerning matters within the scope of this Covenant Not to Sue and that, if successful, such suits or claims could obligate the Settling Parties to pay amounts in addition to the amount specified in Attachment A for such matters. It is the expressed intention of EPA and the Settling Parties that the Settling Parties not be required to pay amounts in contribution for such matters or be required to remain as parties in any suit or claim for contribution concerning any matters within the scope of this Covenant. It is also agreed that EPA shall be under no obligation to defend the Settling Parties in any such suits or claims. Therefore, if as a result of any action brought by the United States against a non-settling party with respect to work done by EPA at the Alburn Site, any court of competent jurisdiction enters a final judgment requiring one or more of the Settling Parties to pay an amount for matters within the scope of this Covenant, then the United States agrees to adjust the amount of any such judgment(s) obtained against any non-settling party(s) in such action so that none of the Settling Parties shall be required to pay all or any part of said amount.

7. EPA and the Settling Parties agree that the Covenant Not to Sue contained herein shall be construed as a Covenant Not to Sue only as between EPA and the Settling Parties.

8. EPA and the Settling Parties reserve all rights that each may have to assert claims against non-settling parties arising out of the Alburn Site or its operation and ownership, including without limitation claims for breach of contract, tortious conduct, indemnity, contribution, nuisance, and claims under applicable federal, state and local laws. EPA or any of the Settling Parties may covenant not to sue other parties for liability pertaining to the payment of EPA's response costs to the date of the execution of this covenant. It is agreed that any such covenant not to sue shall not be binding on any party not a signatory thereto and shall not provide any general or special release from said liability within the meaning of Illinois law.

9. Each of the Settling Parties agrees not to assert any causes of action, claims or demands against EPA or the Hazardous Substance Response Trust Fund with regard to expenses incurred by the respective Settling Parties at the Alburn Site to the date of EPA's signature to this Covenant, without impairing or affecting the claims of the Settling Parties against any other person, firm or corporation in connection with the Alburn Site.

10. Each of the Settling Parties agrees to timely notify EPA of the institution of any suit or claim for contribution brought by it against a non-settling party.

11. EPA and Settling Parties agree that they will preserve for three years following the execution of this Covenant, all records and documents in their possession and in the possession of any of their subsidiaries, divisions, parents, affiliates or their respective directors, officers, employees, agents, accountants, or attorneys, which relate to any transactions or business with, or relate in any other way to the response action at the Alburn Site, despite any document retention policy to the contrary. Notwithstanding any other provision of this Covenant, EPA and the Settling Parties retain whatever rights they may have under applicable statutes and regulations governing the retention of records and documents which are the subject matter of this paragraph.

12. This Covenant applies to and is binding upon EPA and the undersigned parties and their successors and assigns. Each undersigned representative of the parties to this Covenant certifies that he or she is fully authorized to enter into the terms and conditions of this Covenant and to execute and to legally bind such party to this Covenant.

13. In the event that the Settling Parties fail to make payment as specified herein, this covenant shall be null and void.

14. The terms of this Covenant Not to Sue are effective upon execution by EPA.

15. This Covenant Not to Sue may be executed in duplicate counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

EPA and the Settling Parties execute this Covenant by their duly authorized representative.
